SUMMARY

As a dedicated Software Engineer with expertise in full-stack web development, I currently serve as an **Associate Software Engineer at Xcel Tech**. With over **2 years of experience in the MERN stack**, I specialize in developing scalable web applications, designing intuitive user interfaces, and building efficient back-end systems. **Proficient in React.js, Next.js, Node.js, and Express.js**, I play a key role in developing and delivering solutions that enhance user experiences and optimize business operations. I am also Keen on exploring new opportunities

SKILLS

FRONT-END: HTML | CSS | JavaScript | React JS | Next JS | Typescript | Bootstrap | Tailwind CSS | MUI

BACK-END: Node JS | Express JS

DATABASES: MongoDB | MySQL | Supabase

LANGUAGES: JavaScript | C++ | C# | OOP | Python (Basic)

OTHER: Git & GitHub | Version control | Cursor AI | Vercel | Figma| PSD | N8N Automations | AI chatbots

EXPERIENCE

Associate Software Engineer (ASE)

Mar 2025 - Current

Xcel Tech

- As an **Associate Software Engineer**, I specialize in developing **AI automations using n8n, AI chatbots, and AI agent workflows**, building strong expertise in automation and AI-driven solutions.
- I also optimized websites performances (**achieving 90%+ Lighthouse scores**), worked on **full-stack projects**, and transformed **Figma designs into responsive, production-ready websites**, consistently ensuring client satisfaction.

Front-End Developer

(3- months Internship)

Iconic Think

- During this internship, I gained foundational and advanced understanding of HTML, CSS, JavaScript, and React.js by completing multiple mini projects.
- Improved **problem-solving and collaboration skills** through code reviews, debugging sessions, and responsive design work, while working under mentorship to advance front-end expertise.

Full Stack Developer [Fiverr](#) | [Upwork](#)

Oct 2023 – Present

Self Employed (Freelancing)

- As a **Fiverr Level 1 Seller**, delivered **80+ projects** on Fiverr and Upwork with a **4.9/5 client satisfaction rating**, covering **Figma-to-code conversions, website maintenance, bug fixing, and broken UI fixes**.
- Gained valuable experience working with **diverse clients worldwide**, strengthening skills in **requirement gathering, effective communication**, and delivering client-focused solutions.

PROJECTS

Real Estate Platforms | [Buy Properties](#) | [Henderson Realty](#) | [Developments.pt](#)

- Developed and delivered **multiple real estate websites** for a client based in Portugal, transforming **Figma wireframes** into responsive, user-friendly **websites** with property detail pages, **advanced search** and **filtering**, **interactive Mapbox maps** with **custom popups**, and **multi-step forms and pages**.
- Implemented **mortgage, IMI, and IMT calculators**, **automatic property PDF generations**, and **dynamic modules** (blogs, services, news), ensuring scalability, client satisfaction, and alignment with modern real estate business needs.
- **Technologies:** Next.js, Tailwind CSS, Node.js, Express.js, Mapbox, OpenStreetMap

AI-Based FYP Management System (NLP) | [Live Link](#)

- Developed an **AI-powered FYP management system** with dashboards for students, supervisors, and committee members. The system's core feature was **online meetings with transcript generation** and **log maintenance**, along with comprehensive task management, **attendance monitoring**, and **marks management**. Built using **React.js**, **Node.js**, **MongoDB**, **Tailwind CSS**, and a **deep learning model**.

Shaheen School Management System | [Live Link](#)

- Developed a **MERN stack school management system** with role-based dashboards for admin, principal, primary head and teachers. Core features included **student**, **teacher**, and **class registration**, **fee challan generation**, **attendance tracking**, **marks management** with **lock/unlock controls**, and **automated weekly, monthly, and term-wise result sheets**.

MK Car Stock Management [Live Link](#) | Kitchen Mate [Live Link](#)

- Developed a MERN stack application with secure authentication, **customer and car stock management**, and an **automatic matching feature** that suggests potential car-customer matches
- Developed a MERN stack e-commerce platform for kitchen & grocery products featuring **shopping cart**, **order tracking**, **returns**, **secure auth**, and an **admin dashboard** to manage products and operations.

EDUCATION

Bachelor of Science in Software Engineering

- Mirpur University of Science and Technology (MUST), Mirpur AJK

Nov 2020 – Sep 2024

CGPA: 3.3

CERTIFICATIONS

- [Meta Front-End Developer Specialization](#)
July 2023
Offered by Meta, Completed on Coursera
- [Meta Back-End Developer Specialization](#)
March 2024
Offered by Meta, Completed on Coursera
- [Credly Badges](#)

LANGUAGES

- **English** – Professional Proficiency
- **Urdu** – Native
